Clifton Park Planning Board, June 13, 2006

Mr. Chairman and members of the Board,

We have one thing in common with the New Jersey developer. We both have been consistent and persistent over the past 18 months ... giving little ground and repeating the same points over and over. Now the Planning Board must make a decision. We have done our best to present objective arguments and we have asked repeatedly for a positive SEQRA declaration. If your decision favors the New Jersey developer over the long time residents of Clifton Park, then we need to assess what may happen in the future. At least we have documented the severe water situation. Our letters, our presentations and the Planning Board minutes will be valuable resources if the worst of our water predictions come true.

Thank you
