

AGENDA

General overview of the project (Q and A Session)

What is SSLR and what are the technologies we are working with (Background Discussion)

Pixels

Camera System

Interface

What a good knowledge base (textbooks, etc.) for information resources

Talk about Github, and the stuff we've figured out already

What specifically are we expected to deliver and when (deliverables and deadlines)

What hardware should we buy right off the bat and how should we do that

What hardware are we going to use for the final project: FPGA, development boards, etc.

Some kind of camera we can use (preferably not SSLR) – really simple USB camera

Feed video file into system

How we get output to FPGA (media player, camera, etc.)

Timeline (Secretary Stuff)

When and where we'll meet

Who is going to take what role: Minutes, budget, who we report to, what we need to do, etc.

Ask about other faculty and student resources (CS person to help with VLC plugins, etc?)

How are we supposed to divide the labor, what individual roles, etc.

Ask about internships

Ask about reporting strategies (Dr. Ay, Dr. Assefi, etc.)

Ask about team Sri Lank Railway

Tuesday at 2:30 work for everyone to meet weekly
