

Yifan Zhu: Can we use TeamViewer through the whole lab? All the labs?

Doctor Johnson: If it has a function, I mean, parts of them for you to recommend options for doing it that they work. I mean the idea for your design team, it's a suggest way that we can do these remote labs and then ask them and see if they were if ITs will let us install it on the computer, you think you can do the labs at work for the labs. If you can show that, then we can look at using it.

Yifan Zhu: Who are the assistors to help us set up the lab to implement remotely? You suggested 2 in last semester.

Doctor Johnson: One of them got a job and isn't here anymore. I will follow up with the other one. Abdullah. I can't remember if you wanted to be part of that.

Abdullah: Yeah, I'm interested to be right.

Doctor Johnson: I think as far as setting a time that's really once we have the assistant finalized that's gonna help you. It's really working with that, working out with them.

Yifan Zhu: I think it's better be the afternoon in the UI because I don't think we can stay up late because the time difference in China.

Abdullah: I think Harry is likes to work afternoon.

Doctor Johnson: Yeah, I like I think it's he's still interested in it. So Harry, Charlotte, one of the people I mentioned last semester is interested in and helping you as well. I think that you should be. I it's basically just coming up with the time it works with him in Abdullah.

Yifan Zhu: Then we will also make a plan about the implementation. We'll let them know. Thank you.

Abdullah: After we get a reply from him, doctor Johnson sent me an e-mil. We can sit down and set up a time with him.

Doctor Johnson: I'll send them an EMAIL and when I get his response, then I will get him in. It is not giving us contact Information to you.

Yifan Zhu: I think this is all this is there all the questions?

Abdullah: I have one thing to follow up with you like the EXPO have you received the form?

Yifan Zhu: Yes, we have received the file from doctor li and we are currently working on it. I believe we will be soon. Send it on the website.

Abdullah: I think we'll have like. In February next month, we'll have a design review or snapshot 3.

Doctor Johnson: Usually it's about the first week in everywhere you have a second design review. Giving an update on your progress towards the project, talking about any problems you're running into or things that we need to change because of unforeseen problems. And then on in March, there will be another snapshot day.

Abdullah: I think also they mentioned like before the end of the semester, they have to submit the final report yesterday during the lecture. Have you attended the lecture yesterday?

Yifan Zhu: Yes.

Abdullah: They weren't talking about submitting the final report.

Doctor Johnson: Yeah, and before usually it's due like a Friday before finals maybe. Until you'd be submitting a final report and also turning over copies of files and stuff like that. And to find yours in this case, the department can follow up and make use of them not the fastest though.

Yifan Zhu: Okay, I think that's all for today. Thank you for your time. Doctor Johnson, smarty. Thank you. Bye!
