# DFIG MINUTES

---

3/25/2015

## Discussed within meeting

- Good break?
- Alaap – made some progress in the Model
  - Getting ready to set up
- Hardware update?
  - Good to work together
  - Gains all set up
  - Matching on what we're seeing
    - Startup isn't an issue with hardware
    - Harder on software
  - Simulate in s.s
    - Still getting code adjusted
    - ABB works just fine
  - Homemade number will be issue –
    - Various gains that will need to be set
    - Easier to see gain in RSCAD
  - Coordination of gains
- **SOON – SOON—SOON**
- **Need to get a test procedure**
  
- **Get update**
  - Take a larger view of the machine to get new gains
  - Dr. Hess might have some value to adjust
    - Doesn't need to be perfect, CLOSE

## Items to address

- **Get a testing procedure**
- **Look at stability**
  -
