

Meeting Notes

January 18, 2017

What was discussed:

- Lori can't meet this week. Will try to set up meeting with her next week on Tuesday, January 23 at 3:30 pm. Location TBA.
- Based on the meeting with Dr. Wolbrecht we don't need to look into different sensors so we're good to order parts to build a second prototype
- Need to look into improving the display
 - Perhaps a mannequin we could put the arm on
 - Would be great if we had a wearable version
- Mechanical engineering's plan for how to proceed
 - Order parts
 - Piece parts together
 - Design cases
 - Jacob will continue to improve on the case for the back
 - Quinn will design the wrist case
- Computer science
 - Are willing to accept a third CS person on the team
 - Ideally someone who wants to do database stuff would be best but if they want to work on other parts both Matt and Ruth would appreciate the help
- Design Expo Registration
 - Worked on registration, the abstract still needed some work so it hasn't been submitted yet
 - We will be doing a technical presentation at the expo

To do before next meeting (1/25)

- Alex to set meeting with Lori for 1/23 at 3:30
- Quinn to order a second set of parts
- Matt to get the design expo registration done, due by 1/23

Agenda for Next Meeting:

Date: Thursday, January 25, 2018

Time: 3:30 pm

Place: Think Tank Room A

Agenda:

1. Discuss when to meet with the therapists next

2. Start working on Detailed Design Review
