

9/30/14

Client Interview

Goal- learn more about project requirements

Question- what are the main requirements of the design?

Entrances 2-5

Many tunnels will connect

1.5 meters deep

Entrances 2-3 meters apart

Tunnels 4-5 inches

Question- what do you want/need in the project?

Client goal- understand geometry of burrows and their effects on the ecosystem

Need- volume measurement

Want- map/pictures

Question- how long do you want each mission to take?

Each trip to the burrow should be as short as possible

Question- what kind of terrain will we encounter?

Terrain-roots, rocky soil, winding tunnels(not expecting vertical sections), smooth stones

Burrows will be durable

Question- Budget?

Anything less than 1000 dollars is acceptable

Notes-

Lights on drone are ok, gps data on hole location may be available, we may find additional animals, purpose of pictures is to see what is in the burrows
