Good for the price

Reviewed in the United States on September 9, 2019

Good deal for the price. Only problem I had is they are all off of 41k ones 39k and the highest of them was 44k. If you need accuracy can deal with them being off a bit then you'll be happy.

NOTE: you can always add a resistor between the pot and what you need truly a 50k.

Low quality. As with other buyer(s), the mounting nuts and was ohm spec'd measured 900 ohm. Buy cheap and you get cheap.
