Old Business:

Math Model-

Is it good to go?

Data manipulation-

Have the data need to start putting it into math model

FEA-

Start using our force data to start re-design NEXT WEEK

Would be nice to have an original drawing package to show changes

Start manipulation Monday at 1:30

Value Proposition Statement

Need to get on this and have something by end of the week that we think is solid.

Ideas:

Nightforce is a company that manufactures high precision goods. In order to keep this quality we have been tasked with redesigning a rifle scope mount to keep critical parts from creeping or drifting. Or something I don't know

New Business:
