

Meeting with Joe Stanley and Team @ 2:30pm
Location: BEL G10, industrial controls Lab

Budget Review

- As we are still navigating goals of project, submitted budget will act as a first draft.
- Budget includes the following items:
 - Cost of attendance and travel to Western Protective Relay Conference.
 - Cost of materials for snapshot days and Engineering Expo 2020.
- Budget was approved by team members and submitted.

Meeting with Joe Stanley

- Joe introduced us to motor protection relay.
- Joe helped us with a hands on demonstration of motor protection relay functions.
- We learned the following concepts:
 - Crimping wires
 - Powering on motor protection relay.
 - Communicating via RJ45 connection to laptop.
 - Changing name of device through putty.
 - Reading setting of device through putty.
- Joe suggested that we turn our experience with the motor protection relay into a lab experiment.
- Joe has told us that he has an idea for a class he would like to implement. To help us experience it, we will be participating in more of his labs.

Takeaways & Lessons Learned

- Hands on experience will be the most beneficial to our learning of devices.
- We are still forming as a group, and must develop roles as to our parts in the project.
