

Team meeting Agenda 3/23/15

- Go over new proposed timeline
 - Adjust if necessary
 - Do design review with amandeep March 27th
- We are in the system design phase of the project.
 - By April 15th we will have 2 substations networks established& functional
 - Need 2nd gateway →2800
 - Is ECE 422 doing a lab – can SEL sponsor some?
 - 16 samples per 60hz
 - Portfolios → due March 30th
- In order to see if the systems are operating correctly, we need to simulate faults. On the system. So we have to learn what circuit.the system is protecting & how to simulate faults.
- Circuit diagram? 2Xmission lines
- Can we change the setup to 1 transmission&1 distr.
- How can we view event log& response times?
 - What are other universities doing with smart grid?
