#### Defective motor

Reviewed in the United States on August 20, 2020

**Verified Purchase**

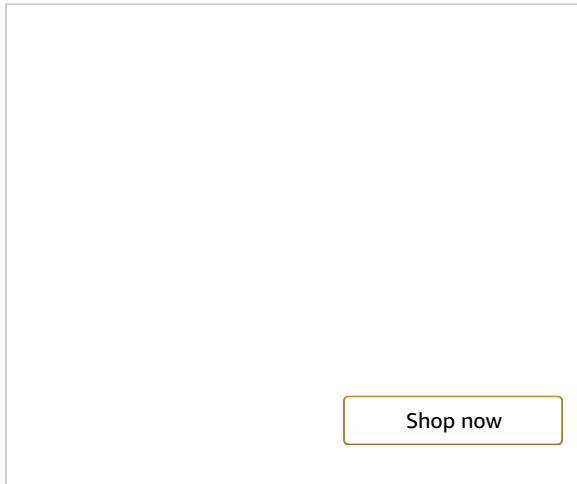

Today I powered this motor in preparation for installation on a the get go but then started running in what seemed a normal r burning could be smelled and when I shut it down, there was a and excessive heat at the connections plus the esc was getting did not use or test this motor and the return window has closed

### Poor durability

Reviewed in the United States on June 24, 2020

**Verified Purchase**

The wire coverings are very soft and fragile. Two of them split and I had to add any extra support and now the bare wires are exposed to the motor. The propeller shaft is very long (14mm) so the propeller sticks out a lot and looks silly. Otherwise it puts out good power.
