

# THE BEAST

Team Meeting #12

Wednesday, July 31, 2019

## AGENDA

| <u>Topic</u>        | <u>Item</u>                              | <u>Resolution</u>  |
|---------------------|--|--|
| <b>Old Business</b> |  |  |
| Example             |  |  |
| <b>New Business</b> |  |  |
|                     | 1. Snapshot (Nick)                       | 1. Plan for snapshot is to occupy the back room of the senior design suite. Here we will use two of the 8ft tables side by side to illustrate the size of the BMP. One person will discuss the general points of discussion (budget, etc.), one will discuss the control system, and one will discuss the suspension and frame. The two remaining each rotation will have a chance to view other teams tables. |
|                     | 2. Deliverables and Action Items (Chris) | 2. Action items document was created for the completion of the second portfolio check for Friday. On Thursday evening, everyone will review portfolio items, and make changes as necessary based upon the mindworks slide and Dr. Swenson's critiques.   |
|                     | 3. Wheel Assembly Prototype (Will)       | 3. After getting the prototype brackets cut with the plasma cutter, Will cleaned them up, and they fit together well. Further he managed to get a rear bike shock for fitment testing from the bike collective in exchange for an acknowledgment of the bike collective.   |
