

Client Interview Questions / Strategy

Strategy:

Our first meeting will be over zoom. All team members are expected to attend and participate by asking the client questions.

Questions:

- Is the client open to other design ideas than what was initially presented?
- Is there a weight restriction for the device?
- What are the dimensional restrictions for the device?
- Has the client already tried creating a device and if so, how did it work or why did it not work?
- Would it be possible to get a tour of the facility?
- Has the budget changed and if so, what is the new budget?
- Are we allowed to talk with others outside of the CNR fisheries research about the project (ex. Other fish hatchery personnel)?
- How often will the device be used?
- Does the device need to be easily retrofitted for different sizes of fish?
- How often would you (Ken Cain) like to meet and be updated on project progress?
