

Meeting Minutes

Lydia Engerbretson

Hannah Pearson

Matt Covalt

Matt Waltz

January 10, 2018 1:30pm-2:15pm

Agenda Notes/Status Report

Status: We discussed the schedule and plan of attack for this semester.

We plan to have a simulation of the algorithm for the detailed design review (2/7). For the algorithm, when we write the code, we need to write unit tests to go along with the code.

Waltz and Covalt plan to have a detailed block design of what happens with the driver and the FPGA hardware. They do not have a lot of time since we do not have parts yet.

Roy needs to determine a simulation of an antenna design and specific and practical implementation (list of equipment needed) for detailed design review (2/7).

Key Decisions

* Key Decision: Waltz, Hannah, and Lydia meet in Think Tank on Friday (1/12) at 1:30PM.

* Key Decision: Plan to have everything done and ready to test by 3/30.

Action Items

* Team: Email client for parts ASAP.

* Team: Confirm with client of team meeting time (Wednesdays, 1:30pm).
