

## Team meeting agenda 2/9/15

- Ask about SEL Client
- Tour Model Power Lab
  - Learn about SEL relays
    - What types
    - What are their functions
  - How can we learn more?
    - Review ANSI codes for #S.
- Describe the function of a generic relay.
  - It's a microcontroller
  - It has 4 functions
    - Inputs(sensing voltages,currents,time)
    - Inputs (messages from the other relays)
    - Descition(determines a message to send based on a received inputs)
    - Output (communicate to other relays&networks)
- Upcoming due dates
  - Client interview
  - Expo registration
