

Team Meeting Agenda 4-27-15

- We documented the current state of the network.
- We were planning on buying some unmanaged switches to configure a generic communication network, but we did not buy them since we were not 100% sure they were compatible with the system & if they did not work, there would be a 15% restocking fee.
 - We will be ordering some 5-port Netgear switches.
- Talk out our plan to load network & test performance characteristics.
- Talk about security.
- EXPO is May 1st. We are creating our poster this week.
