

ECE 480: Capstone Design

Team: Simulation Sages

Project: 42 Hardware in the Loop Simulation

**Budget**

For this project the only foreseeable expense that will need to be budgeted for is the poster for the final presentation at the end of the year. Printing expenses for the poster are estimated at \$150.

Dr. Johnson has grants and endowments available to cover this expense.

Since this project only involves creating simulations of power systems using equipment that the university already has, there are no equipment, fabrication, materials, supplies, parts, or service expenses.
