

## 11/30/20 Thumb Wrestler Meeting Minutes

Present: Avery, Royal, Ryan, Cobi, Dr. Perry, Dr. Wolbrecht, Vish

Location: Zoom

- Everyone is still in Moscow
- Face mounted shaft is in tolerance and wasn't changed.
  - o Cobi suggested pressing bearing onto shaft
  - o Galling is possible if pressed together
- Need to have start having parts made at outside shop because of shop restrictions
  - o Dr. W stressed that we need to start having parts made quickly and start knocking out FINGER 2.0 so it is ready to go to Cali
- Need to have everything in Share drive
  - o Dr. P suggested us all having our own sub-assemblies that can be changed by us and is then updated into the main assembly
- Need to be in town for 6 days and get retested to be able to enter shop
  - o Clarify with Bill
- Note from Vish:
  - o At my end, I have all the actuators moving and, on the network. Still having a bit of trouble with the two drivers communicating with each other, hoping to have that fixed before Thursday.
- Spent time going over fits of face shaft compared to shoulder bolts
- Decided to have Bill machine 3 more and need to have a quantifiable data base that shows why the face mount is better.
