

MINUTES – Fly Rollers Meeting 22 (4/7/16)

Dr. Santora and all team members present except Philip

Discussion:

- a) Team FIGs updated Santora on their progress
- b) Most action items remain constant for each member. We continue to ask questions and make progress in our individual goals

Action Items:

- 1) Philip will continue taking the lead on coding
- 2) Evan will continue taking the lead on wiring, piping and constructing the flywheel
- 3) Brian will confirm a power supply, work on the wikipage, and find needed PID constants
- 4) Gavin will continue working through BiSS communications, on the Expo poster, and work with Brian to modularize our team's contributions into neat summaries
- 5) Everyone needs to continue writing their portion of the final paper

Respectfully Submitted,

Gavin Meyer
