

TEAM MINUTES - 11/11/20

Location: Zoom
Present: ALL
Time: 2:30-4:30
Writer: Jaden Cavender

Agenda Items

1. Continued working on Design review documentation as a team. Reviewed Gantt chart, design requirements, and plans for building. Also reviewed presentation of 3-d printed parts.
2. Discussed idea of having a 3-d printed screen interface that will allow sand particles to roll on lanes that will drop pieces of sand through holes. Idea could lower cost of having a custom-made screen and increase speed of experimentation.
3. Set day to start experiment assembly to Thursday.

Action Items	Owner(s)	Deadline	Status
Purchase necessary parts for assembly, assemble	Jaden	11/12	In Progress
Talking with budget supervisor	Ben	11/11	In progress
Taking detailed notes early for design review.	Tobias	11/10	Complete
Design 3-d printable screen if possible	Tayson	11/11	In Progress
