

Meeting Minutes 1-19-2021

Mohamed and Kate will meet MWF to work on the circuit.

We decided that we needed to focus on the rat edition this semester more.

We asked if there was a place that we could order the electrodes. Dr. Kumar was unsure, but mentioned that we could talk to a previous team member.

Jake mentioned that he had sewn on the felt tips.

We discussed the progress made on the code.

We asked about BEL access, and Dr. Kumar informed us that we would have to ask for special permission from the college.

We decided that Tuesday the 16th of February would be our engineering release review.

Dr. Kumar then mentioned that it would be better for us to finish one project, rather than have 2 half finished projects. We can continue to work on and finish the Human edition first. He also mentioned that it wouldn't be that big of a deal if we didn't end up getting the rat project finished.

We also mentioned that we would need to message Kiran about re-subscribing to Emotive.
