

## **MINUTES – Fly Rollers Meeting 6 (10/15/15)**

All team members present and client Michael Santora and client Herbert Hess

### **Discussion:**

- a) Santora checked to see if we had read the theses
- b) We talked about how SNAPSHOT went. We felt pretty positive about the experience
- c) We discussed how microcontroller packaging could make the wiring a lot simpler between the microcontroller and the H-bridges
- d) Each microcontroller has flash memory and the capability to control four stator coils

### **Action Items:**

- 1) Everyone needs reread Brent's and Kevin's thesis
- 2) We should carefully review the potential control setup on page 47 in Kevin's thesis
- 3) Evan needs to finish the Gantt Chart
- 4) We need to get the SASB functioning

Respectfully Submitted,

Gavin Meyer
